PROFILE SUMMARY:

Hello! I am Vladimir Grigoryan, Senior JavaScript Developer.

As a seasoned JavaScript developer with 9 years of experience, I have honed my skills in working with various frameworks and technologies. Over the past 8 years, I have specialized in Angular 2+ and React, while also gaining proficiency in Node.js, MongoDB, and UI libraries such as Bootstrap and Material-UI.

Throughout my career, I have tackled numerous challenges and delivered successful projects by leveraging my in-depth knowledge of JavaScript and its associated ecosystems. My experience with Angular 2+ spans over 4 years, during which I have developed scalable and efficient web applications, harnessing the power of TypeScript and Angular's extensive feature set. I am well-versed in building complex components, managing state with services and observables, and optimizing performance using lazy loading and tree shaking techniques.

Additionally, I have dedicated an equal amount of time to React, working on projects ranging from small-scale applications to large enterprise solutions. I am skilled in developing reusable and maintainable React components, utilizing modern state management libraries like Redux or MobX. I also have experience with React hooks, context API, and the latest features introduced in ES6 and beyond.

Furthermore, my expertise extends to server-side development using Node.js and working with databases, particularly MongoDB. I am proficient in designing and implementing RESTful APIs, integrating third-party services, and handling authentication and authorization mechanisms. I have used Express.js as my go-to framework for building robust and scalable server-side applications.

To ensure excellent user experiences, I have extensively employed UI libraries such as Bootstrap and Material-UI. These libraries provide a rich set of pre-designed components and styles, allowing for rapid prototyping and consistent designs across projects. I am well-versed in customizing and extending these libraries to match the specific requirements and visual

aesthetics of different applications.

With my extensive experience and strong technical skills, I am adept at collaborating with cross-functional teams, understanding business requirements, and translating them into effective technical solutions. I am passionate about staying up-to-date with the latest industry trends and continuously learning and refining my skills to deliver high-quality code.

Overall, my nine years as a JavaScript developer, with a focus on Angular 2+, React, Node.js, MongoDB, and various UI libraries, have equipped me with a solid foundation to tackle diverse projects and deliver innovative and robust solutions. I am enthusiastic about taking on new challenges and contributing my expertise to help drive the success of your organization.

EDUCATION & CREDENTIALS:

Instigate Design Engineering Company (2013 Feb – 2013 May)
Linux Architecture (TCL, BASH)
Web technologies (Html, CSS, JavaScript) Parallel
System Development (Proximus)
State Engineering University of Armenia, Goris, Branch, RA (2005 – 2011)
Informatics & Mathematics

PROFESSIONAL EXPERIENCE:

NEW SILVER LLC
Senior full stack developer: SEPTEMBER 2021 - PRESENT
Remotely (Los Angeles, USA)

GXP LLC
Senior Front End developer/Team Lead: MAY 2020 - SEPTEMBER 2021
Remotely (Los Angeles, USA)

RONTE LIMITED LLC
Front End Team lead: NOVEMBER 2018 - MAY 2020
Remotely (Berlin, Germany)

Tech Flow Studio LLC
Tech lead: FEBRUARY 2018 - NOVEMBER 2018
Remotely (Moscow, Russia)

DataOwl LLC
Full stack JavaScript developer: SEPTEMBER 2017 - FEBRUARY 2018
Office (Yerevan, Armenia)

SecurityTrails LLC
Front-end developer: NOVEMBER 2016 - SEPTEMBER 2017
Remotely (Los Angeles, USA)

Simply Technologies LLC

Front-end developer: NOVEMBER 2015 - JANUARY 2017
Office (Yerevan, Armenia)

Iguan Systems LLC
Front-end developer: MARCH 2015 - NOVEMBER 2015
Office (Yerevan, Armenia)

Instigate Design LLC
Front-end developer: JANUARY 2014 - MARCH 2015
Office (Yerevan, Armenia)

TECHNICAL SKILLS:

- JavaScript, HTML 5, CSS 3, PUG, EJS, RXJS, jQuery
- Node.js, Express.js, Sails.js, React.js, Redux, Vue.js, Vuex, Angular.js
- NPM, GULP, GRUNT, BOWER, XML, Google API, Webpack
- Ionic, React native, Cordova
- TCL, BASH and other scripting languages
- C/C++

AWARDS & ACHIEVEMENTS:

- 2004 third place in Mathematics (Armenia, regional)
- 2004 first place in Informatics (Armenia, regional)
- 2002 second place in Mathematics (Armenia, regional)

PROJECTS:

NEW SILVER FRONT APP
- Environment: Angular 2+, RxJs, Ngrx store, TypeScript
- Duration: 21 months
- Description: Capital to real estate investment app.
- Role: Worked as Senior full stack developer at New Silver LLC.
-

NEW SILVER ADMIN PANEL
- Environment: Angular 2+, RxJs, Ngrx store, TypeScript
- Duration: 21 months
- Description: Admin panel for underwriters and originators..
- Role: Worked as Team Lead in Ronte Limited LLC.

ACROPLIA
- Environment: React.js, Redux, Immutable.js, Jitsi Api, Voxet Api
- Duration: 17 months
- Description: Acroplia is the all-in-one communication, collaboration, and community platform for teams, families, & online learning
- Role: Worked as Senior React developer/tech lead GXB LLC.

BLACKCATCARD WEB APP
- Environment: Angular 2+, RXJS, Ionic 4, Typescript
- Duration: 18 months
- Description: Online banking web app.
- Role: Worked as Team Lead in Ronte Limited LLC.

BLACKCATCARD WEB APP
- Environment: Angular 2+, RXJS, Ionic 4, Typescript
- Duration: 18 months
- Description: Online banking web app.
- Role: Worked as Team Lead in Ronte Limited LLC.

BACKEND FOR CRYPTO MODULE
- Environment: NodeJS, ExpressJS, mongo
- Duration: 6 months
- Description: Server side for crypto module.
- Role: Worked as NodeJS developer in Ronte Limited LLC.

PETSHARING
- Environment: React native, Redux
- Duration: 9 months
- Description: Pet services app.
- Role: Worked as react native developer in Tech Flow Studio LLC.

PETSHARING ADMIN
- Environment: React, Redux
- Duration: 5 months
- Description: Admin panel for pet services app.
- Role: Worked as react developer in Tech Flow Studio LLC.

BACKEND FOR PETSHARING APP
- Environment: NodeJS, ExpressJS, graphQL, PostgreSQL, Prisma
- Duration: 9 months
- Description: Server side for PetSharing app.
- Role: Worked as NodeJS developer in Tech Flow Studio LLC.

DATAOWL
- Environment: AngularJS, SCSS, HTML5, D3.js
- Duration: 4 months
- Role: Worked as senior Front-end developer in DataOwl LLC.

SYNC TOOL
- Environment: React, Redux, React-router, ElectronJS, NodeJS, PostgreSQL
- Duration: 5 months
- Description: Data synchronization tool.
- Role: Worked as senior Front-end developer in DataOwl LLC.

SECURITYTRAILS
- Environment: React, Redux, SCSS, Server-side rendering
- Duration: 11 months
- Description: Digital marketing assistant.
- Role: Worked as senior React developer in SecurityTrails LLC.

LATE-FOR-WORK
- Environment: Express.js, Node.js, React.js, Redux, mongo, Amazon S3, Slack API.
- Duration: 2 months
- Description: Automate send the mails 'late for work'.
- Role: Worked as full stack developer in Simply Technologies LLC.

EVENT-BOT
- Environment: Express.js, Vue.js, Vuex, Node.js, mongo DB, FB API, wit.ai.
- Duration: a month
- Description: Facebook Messenger chat bot for wide variety of events.
- Role: Worked as full stack developer in Simply Technologies LLC.

REST-BOT
- Environment: Express.js, Node.js, mongo DB, FB API, wit.ai.
- Duration: a month
- Description: Facebook Messenger chat bot for restaurants, cafes, bars & pubs.
- Role: Worked as back-end developer in Simply Technologies LLC.

SALON-BOT
- Environment: Express.js, Vue.js, Vuex, Node.js, mongo DB, FB API, wit.ai.
- Duration: a month
- Description: Facebook Messenger chat bot for salon booking.
- Role: Worked as full stack developer in Simply Technologies LLC.

BOT-ASSIGNER
- Environment: Express.js, Vue.js, Vuex, Node.js, mongo DB, FB API, wit.ai.
- Duration: a month
- Description: For assign FB pages to bots and add additional info to page.
- Role: Worked as full stack developer in Simply Technologies LLC.

MASSMEDIA
- Environment: Node.js, Express.js, JQUERY, mongo DB.
- Duration: 3 months
- Description: TimeLine for Karabakh war archive.
- Role: Worked as full stack developer in Simply Technologies LLC.

RADFRAME
- Environment: Angular.js, D3.js, Django, Docker, PostgreSQL
- Duration: 7 months
- Description: Australian roadmap generator web application.
- Role: Worked as angular.js developer in Simply Technologies LLC. The project contains six large modules. Refactor app

WEBINARIGNITION
- Environment: Angular.js, Sails.js, Node.js, Mongo DB, YouTube API, Socket IO, FB API, Google Hangout API.
- Duration: 4 months
- Description: Web platform for creating professional live & automated webinar funnels.
- Role: Worked as full stack developer in Simply Technologies LLC.

HACKERDECROISSANCE
- Environment: jQuery, Xenforo CMS
- Duration: 3 months
- Description: Forum Growth Hacking and Web marketing.
- Role and Responsibilities: Worked as Xenforo developer in a large team.

EMOCIONDAY
- Environment: Magento 1.9
- Duration: a month
- Description: Web Site on Magento
- Role and Responsibilities: Worked as Magento developer in a large team.

MAGENTO_AUDIT
- Environment: PHP, Apache, MySQL, jQuery
- Duration: a month
- Description: Creating tool which is make audit all general aspects of Magento website.
- Role and Responsibilities: Worked as Full Stack developer individually.

OPEN SOURCE PROJECTS:

React express Boilerplate
- Environment: React, redux, redux-sagas, express, NodeJS, mongo
- https://github.com/codeep/React-Express-Boilerplate

React re-captcha google
- Environment: React, google captcha
- https://github.com/codeep/react-recaptcha-google

React re-captcha v3
- Environment: React, google captcha
- https://github.com/codeep/react-recaptcha-v3
